Legamaster

We make communication visible

Discover how Gynzy will change the way of teaching

Legamaster, brand of the edding group

Empowering Educators Together

Our Partnership with Gynzy

We offer more than just interactive displays – **we develop tools that enable visual collaboration** in all its forms. Whether analogue or digital, in the classroom or in hybrid learning environments, our solutions are designed to foster exchange, creativity, and shared thinking. At the heart of it all is one principle: allowing users the autonomy to choose the tools that suit them best.

This level of autonomy is especially crucial in education. **Teaching materials, pedagogical methods, and digital content** are as diverse as the schools that use them – a one-size-fits-all approach simply doesn't work. That's why we deliberately refrain from offering proprietary educational software. Instead, we promote an open system that gives educators the flexibility to make their own choices. Our interactive screens are ready to support any educational vision – without restrictions.

We're thrilled to partner with **Gynzy, a leader in digital education**. Gynzy – renowned in the Netherlands and beyond – offers a modern, intuitive, and pedagogically sound approach to teaching. Developed in close collaboration with educators, its value is clear from the very first use.

Factsheet:
Gynzy

Gynzy - Teaching Tools:
Interactive teaching software for touchscreens in schools.

What is Gynzy?
Gynzy is teaching software for classroom touchscreens enabling interactive lessons and better student engagement. Gynzy is the #1 teaching software in The Netherlands and was voted most user friendly.

User-friendly digital whiteboard
Turn traditional instruction into an interactive experience with a space that's intuitive and easy to use.

Access 2,000+ ready-to-teach lessons
Browse lesson templates across core topics that are customizable to any curriculum. Topics include math, language, science, social studies, and social-emotional learning.

Build interactive lessons with 100+ tools
Unleash your creativity with live participation, interactive widgets, and learning tools to keep students engaged.

Quick access to games and activities
Pull up energizers, brain breaks, and customizable games at a moment's notice. Reinforce lesson material, transition between topics, or just have some fun!

A Strong Plus for Your Portfolio:

Gynzy Preinstalled

With the new EVOLVE 2 and Navigator, we are setting new standards for simplicity, integration and added value in digital education. Both models come with the Gynzy - Teaching Tools app preinstalled – no manual setup required, and **no cost for the first 5 years**.

Preinstalled for EVOVLE 2 and NAVIGATOR. The EVOVLE 1 and the ETX-20 can be upgraded with the NAVIGATOR.

Gynzy
