

Xyte MDM
Take control of every screen, from anywhere.

Xyte is a secure, cloud-based device management platform that lets IT teams monitor, control, and support display fleets from one connected hub, across different brands, networks, and locations.

Available on DISCOVER 3, EVOLVE DYNAMIC, and EVOLVE PRO screens, Xyte provides a scalable enterprise cloud infrastructure with strong security, SOC 2 Type 2 certification, resilience, and high privacy standards.

Product in the Cloud

Easily track, monitor, manage, and update all devices.

- Ready-made APIs for simple 3rd-party integrations
- Manage devices from **multiple brands in one platform**

Support

Stay connected with real-time updates.

- Remote support = faster issue resolution
- Built-in ticketing for easy help requests
- Fewer call-outs, smoother customer experience ng

Expanded Commerce Opportunities

Boost sales with branded storefronts.

- Sell devices, peripherals, upgrades, and licenses
- Multiple business models: one-time, DAAS, or subscription
- Automated channel margin splits

...and More

Beyond devices, Xyte also supports:

- **Automated marketing campaigns** (emails, promotions)
- **Customer segmentation** for targeted offers
- **E-commerce and logistics support**
- Always compliant with the **highest security & privacy standards**
